

MSc Business with Entrepreneurship with Advanced Practice*

London Campus

Level of study: Postgraduate

Mode of study:

Duration: 16-24 months

Overview

Are you looking to complement your undergraduate studies with a business-focused Masters degree that will enhance your employability? This course with Advanced Practice develops broad business skills as you can choose whether your studies include either an internship, or an applied group consultancy project, enabling you the opportunity to work with a real organisation on a live business problem, developing valuable work experience and business insight.

Specialist modules cover the process and practice of entrepreneurship as well contemporary issues in entrepreneurship. The course culminates in either a dissertation or, if you prefer, a Masters project. This course will make you a highly sought after candidate as employers are keen to recruit people who can bring together resources to achieve break-through change and lead new initiatives.

This option offers the opportunity to spend three months gaining all-important work experience and employability skills in a professional work setting. You may be able to extend this over more than one semester in cases where it is adjacent to a vacation period. Support is provided to help source opportunities and to perfect the applicant CV but ultimately the

onus is on the student to secure the internship position.

Key facts

- Put your learning into practice and enhance your employability with an internship or applied group consultancy project
- Part of a select group of business schools worldwide, following accreditation by the Association to Advance Collegiate Schools of Business (AACSB) in business and accounting – the first in Europe to gain the double accreditation
- Upon completion of your programme, you will be eligible for the QA Professional Pathways programmes which will enable you to further develop your skills with one of the UK's largest providers of IT and project management training
- There is no requirement to have studied business or entrepreneurship at the undergraduate level

Please note this programme is currently under review and modular content is likely to change in line with industry and academic developments. Please refer to this course page for the most up-to-date information.

Starts: Jan, May, Sep,

About this course:

What will I study?

The knowledge you gain will be valuable as a business owner or an employee in both start-ups and established organisations. Employers are keen to recruit people who can bring together resources to achieve breakthrough change

and lead new initiatives.

In the final semester, if you have completed an internship you will complete your research and write your dissertation. Every student has a personal research supervisor and will be required to submit an assessed research proposal prior to embarking on the dissertation itself. For those not undertaking an internship and depending on what grade you achieve on the consultancy project, you will undertake an applied management work investigation or dissertation in the final semester.

Advanced Practice stage

The Advanced Practice version of this course offers you a valuable opportunity to secure a work placement or complete a group consultancy project, giving you the experience of the workplace environment or live business issues, and an excellent way to put your learning into practice. This stage of the programme will take place between your second and final semester, and is a semester-long (15 weeks) in duration. Internships as part of the Advanced Practice stage may be paid or unpaid. The alternative consultancy module allows you to work in teams with a business organisation working on consultancy-based projects in real business scenarios. Whether you choose the internship or consultancy project you will successfully develop your business skills and further enhance your employability.

- **September start dates:** your programme will last for up to 21 months. You will have a summer break after Semester 2, and commence your Advanced Practice stage in September.
- **January start dates:** your programme will run for 24 months. You will commence the Advanced Practice stage of the programme in the following January, immediately after your second semester. Please note that there are two summer breaks included in this programme for those starting in January.
- **May start dates:** you will start the Advanced Practice stage of the programme in January, straight after you have completed your second semester. Your programme will run for a total of 16-18 months. Please note that there is no summer break included in this programme for those starting in May.

The Advanced Practice programmes are structured as below:

	Sept-Jan	Jan-May	May-Sept	Sept-Jan	Jan-May	May-Sept	Sept-Jan
September starts	Semester 1	Semester 2	Summer break	Advanced Practice stage	Final semester		
January starts		Semester 1	Summer break	Semester 2	Advanced Practice stage	Summer break	Final semester
May starts			Semester 1	Semester 2	Advanced Practice stage	Final semester	

How will I be taught and assessed?

- Teaching is delivered through lectures, seminars, problem-based workshops, case discussions, practical activities, group work and tutorials, totalling around **14 hours per week**
- You are expected to engage in independent study, around **3 hours per week**
- **Assessment** is based on course work and our methods will include essays, reports, group work, presentations and

the Masters dissertation.

- Taught by **experienced lecturers and academics** who use their industry experience to demonstrate how theories translate into real-life situations.
- **Technology-enhanced** learning is embedded throughout the course to guide your preparation for seminars and independent research
- Benefit from **weekly academic support sessions** designed to build your ability and confidence as an academic learner
- You will be assigned a **guidance tutor** at induction who you will meet with regularly during your studies

Response to Covid-19: our focus is on providing a safe and welcoming learning environment for our students. More information about our [response to Covid-19 and FAQs are available here](#).

Careers and further study

The course includes two modules that are focused on developing global management competencies. Topics during these modules include emotional intelligence, cultural awareness and the ability to work in diverse groups and teams, as well as project management and decision making.

A further module, 'Academic and Professional Development', has a specific focus on self-development. It includes formal sessions with our Careers and Employment Service which offers a range of workshops, one-to-one advice, and networking opportunities.

The course will give you a practical insight into setting up and running a small business. It will be possible to channel your learning into your own business during and/or after graduation.

In the second year of the course, you will be developing a track record of achievement that will help you stand out from other job applicants. We will help you develop an entrepreneurial project, or find an internship, that matches your interests and career aspirations.

Upon successfully completing your course, you may undertake further professional development and training through Professional Pathways programmes. These are offered to our graduates for free, from our partner, QA. [Find out more about Professional Pathways and your eligibility](#).

Whatever you decide to do, you will have the transferable skills that employers expect from a Masters graduate from Northumbria University. These include the ability to tackle complex issues through conceptualisation and undertaking research, the ability to contribute to new processes and knowledge, and the ability to formulate balanced judgements when considering incomplete or ambiguous data.

Modules

All modules are core and 20 credits unless otherwise stated.

Strategic Management for Competitive Advantage (40 credits)

This is a 40-credit core module running in the first semester of the MSc Business programme is developed for those of you who have little or no prior business and management subject experience. The aim of the module is to introduce you to the main business functions – Finance, Marketing, HRM, Operations, Strategy – and show how each can contribute to the competitive advantage of a firm and hence enable the firm to achieve its strategic objectives

Leadership and Management Development

This module engages you in personal and professional development in order that you develop and hone your team working, management and leadership skills, capabilities and attributes, and in so doing, enhance your employability. On this module, you will not only prepare for your first job after you graduate but also kick-start your commitment to life-long personal and professional learning.

In the first part of the module, you will be supported in self-analysis by a range of activities, including the completion of self-administered toolkits to demonstrate an increased self-awareness and self-understanding. A key outcome of this process is how you will be able to exploit this development in order to lead and manage, more effectively in your future careers.

The second part of the module contains activities that enable you to build on your self-analysis and explore further your strengths, weaknesses and areas for development in the context of your career development plans. This will also include the development of knowledge into the global graduate market, (including routes such as self-employment and developing your career with an existing employer) drawing upon local, national and international examples.

Research Methods and Analytics for Business Practice

This module will provide you with essential knowledge and analytics skills needed for you to complete a high-quality Masters Dissertation or Consultancy Project. By undertaking and reflecting on practical research-based activities you will understand the process of designing and carrying out a research study, also you will engage in activities that involve an understanding of data and analysis of data. This will place you in a strong position to undertake your own Masters level research or Consultancy Project.

At the end of the module, you will write a research proposal, this will be assessed and will contribute to your final mark. In the dissertation you will work under the supervision of a member of the academic staff and your proposal will also help to ensure you get the most from this relationship.

Entrepreneurship – Context, Process and Practice

This module aims to increase your awareness and understanding of the issues and challenges of starting up and operating a small business and being entrepreneurial. As entrepreneurship requires a strong focus on practice, this will be achieved by providing you with a practical insight into setting up and trading as a small business, raising awareness of self-employment as a viable career option. You will learn about entrepreneurship as a process, the entrepreneurial person, ideation and opportunity recognition pitching and presenting, business planning, idea validation, resource acquisition, market analysis, customers and selling, entrepreneurial marketing, networking, and accelerators, incubation and support. You will learn how to identify, explore and progress your own business idea and be supported in your experience of planning this idea over the course of the module, recognising patterns and opportunities in complex situations and environments.

Contemporary Issues in Entrepreneurship

This module is developed for those of you who have prior awareness of entrepreneurship and seek a deeper understanding of contemporary issues of entrepreneurship and small business subjects. The aim of the module is to introduce you to the main theoretical concepts of entrepreneurship and small business – Entrepreneurship Characteristics; Creativity; Risk and Strategic Options; Technology Innovation; Networks; Sustainability; Orientation – and show how each can contribute to the activities, success or otherwise of entrepreneurship.

On completion of the module, you will be able to demonstrate critical thinking skills suitable for strategic leadership roles adept at organisational change and innovation and utilise oral, written and communication skills.

Academic Language Skills for Post-Graduate Business Students (0 credits)

The aim of this module is to support your study, language and communication skills for academic purposes in the study in your chosen discipline at the postgraduate level. The module is designed to enable you to become an advanced independent learner. The module is supported by a teaching and learning plan which outlines the formal sessions. Interactive workshops will be tailored to address some of the specific issues that you meet within your discipline. You may also be asked to complete some preparation tasks for some seminars but these will be kept to minimum. You will be expected to identify those skills which you need within your postgraduate programme, and to develop these independently through a range of learning activities that might include extended reading, and reflection.

For students undertaking an internship

Masters Internship (60 credits)

Within this module, you will record your learning experience gained by undertaking a semester outside of the University

as part of your Masters programme by means of an Internship at an external organisation and it will enable you to assess the learning that has taken place in the University with a “real-world” business experience.

The Newcastle Business School Masters Dissertation (60 credits)

You will design a research project of 15000 words while working under the supervision of a member of academic staff who will give you appropriate guidance and support throughout the dissertation process whilst encouraging learner autonomy: this is your dissertation and you will have responsibility for decision making as the dissertation proceeds. You will use appropriate research methodologies and data collection methods to critically synthesise a body of knowledge relevant to the taught programme.

For successful completion of this module, you will conduct research and organise the findings into a comprehensive and explicit structure that is critically assessed and is linked to the conclusions drawn. You will demonstrate this by identifying a topic, critically selecting and applying an appropriate research methodology and data collection method(s) to your chosen research topic, demonstrating a rigorous understanding of the relevant theory and literature and showing how these link to the research method(s). You will also critically reflect on how your research contributes to the understanding of the topic area.

For students not undertaking an internship

Business Clinic PG Group Consultancy Project (60 credits)

As a student enrolled on one of the 2-year Advanced Practice Programmes you may undertake a group consultancy project within the first semester of your second year of Masters study (the alternative is an Internship). Through your work-based experience, you will develop abilities as a problem solver with valued investigative, theoretical and practical business skills. This work-based experience will last the length of the semester and involve the examination of a complex organisational problem or commercial opportunity.

By undertaking this module, you will have enhanced your individual skills, knowledge, effectiveness and employability by locating learning and development within a work-based context and will have critically reflected and evaluated upon organisational practices and the relation with academic theory.

Depending on what grade you achieve for the Consultancy Project, you will progress to one of the following modules:

Applied Management Work Investigation (60 credits)

You will undertake a group consultancy project within the Business Clinic during the first semester of your second year of Masters study. Through your work-based experience, you will develop your ability as a problem solver with valued investigative, theoretical and practical business skills. This will last the length of the semester and involve the examination of a complex organisational problem or commercial opportunity.

This second semester module will involve the development of the client-oriented management report and presentation alongside an individual literature review and personal reflection.

The Newcastle Business School Masters Dissertation (60 credits)

In this module, you will gain an understanding of the academic skills that are required to produce a Masters Dissertation. By the end of the module, you will have written a 3000-word dissertation proposal and a 15000 word Masters dissertation.
