1. Introduction

- Highlight key strategic points (Your Abstract will help)
- Keep it high-level, concise, focused and objective
- No diagrams or images here

2. Motivation and Background

- Bullet points on why you undertook this study
- What were the main motivating and inspiring factors
- Challenges to solve

3. Literature Review- What resources and techniques did you use to write your literature review

- Main themes and resources used in your research
- Outline your work briefly. Provide details only for the highlights of your work and keep this part concise
- Type of techniques used

4. What is your research method and what are the practical steps you used to complete your research?

- Be clear: state the problems and the proposed solutions and results in a clear and concise way
- Explain the process and steps
- Type of research method undertaken
- What results are seen, expected, and not expected
- Use any graphs/charts, or images where they can be easily understood (remember the size of these boxes)
- Results should be presented pictorially where possible (images, graphs, charts, or schematics if they can be clear in this format.).

5. Comment on the feasibility of your chosen method including challenges and recommendations?

- Discussion and analysis
- Challenges encountered
- Recommendations provided
- Potential for further development

6. Conclusions

- The conclusions should be stated briefly. Many viewers read this first, hence it should be easy to understand
- What are the future considerations and to inspire and provide others to continue with your subject and topics
